2025 Hospitality Sustainability Initiatives

Executive Summary

Our commitment to 'Green Stay' initiatives has reduced carbon emissions by 18% this fiscal year. We have eliminated single-use plastics across 90% of our properties.

Water Conservation

Installation of low-flow showerheads and greywater recycling systems in urban locations saved 2 million gallons of water annually.

Energy Efficiency

Smart HVAC sensors in guest rooms have reduced idle energy consumption by 25%. Solar panel installation is planned for all resort properties by 2027.
